“Why are doctors flocking to Practice Fusion? It’s completely web-based, with live phone support, and yes, it’s free.” – ZDNet

About Practice Fusion

Practice Fusion provides a free, web-based Electronic Health Record (EHR) system to medical professionals. With charting, scheduling, e-prescribing, billing, lab integrations, unlimited support and a Personal Health Record for patients, Practice Fusion's EHR addresses the complex needs of today's healthcare providers and disrupts the health IT status quo.

Practice Fusion stands out in a marketplace dominated by expensive, complicated and inefficient EHR solutions. Our unique system breaks down the traditional costs, learning curve and technology barriers to provide a valuable management tool for your practice.

Practice Fusion Certified Consultants are here to help your practice make the transition at every step. Your consultant can help with creating a timeline for the switch, installing hardware/internet access, training your team, selecting add-on systems and ongoing support needs.

Plus, medical providers who use an EHR can receive \$44,000+ in economic stimulus incentives. With Practice Fusion's free system, your practice can pocket the funds. For example: an office with 2 MDs and a PA could receive \$132,000 in incentives. Join the tens of thousands of medical practitioners who are using Practice Fusion today.
